AUSTRALIAN CAPITAL TERRITORY STATISTICAL SUMMARY

1975

Prepared under instructions from the Honourable the Special Minister of State by
J. G. MILLER

ACTING COMMONWEALTH STATISTICIAN

AUSTRALIAN BUREAU OF STATISTICS
CANBERRA, AUSTRALIA

PREFACE

This is the twelfth issue of this publication, which assembles in consolidated form the statistics of the Australian Capital Territory available in this Bureau. The object of the Summary is to present as comprehensive a survey as possible without unduly increasing the size of the publication, a particular feature being a long-term table, wherever practicable, in each of the various statistical fields.

The contents of the previous issue have been advanced wherever possible. Two new tables, one showing labour turnover and the other the number of accidents per 10,000 motor vehicles registered have been included in this issue. The maps have been revised; that of the Territory shows the Canberra City Area as varied on 22 July 1974 and that of the Canberra Divisions now includes the suburbs of Calwell, Chisholm, Florey, Fadden, Gilmore, Gowrie, Isabella Plains, Kambah, Mitchell, Monash, Richardson, Theodore and Wanniassa, which have been added to the list showing name derivations of suburbs.

THE AUSTRALIAN CAPITAL TERRITORY

125. The Seat of Government of the Commonwealth shall be determined by the Parliament, and shall be within territory which shall have been granted to or acquired by the Commonwealth, and shall be vested in and belong to the Commonwealth, and shall be in the State of New South Wales, and be distant not less than one hundred miles from Sydney.

Such territory shall contain an area of not less than one hundred square miles, and such portion thereof as shall consist of Crown lands shall be granted to the Commonwealth without any payment therefor.

The Parliament shall sit at Melbourne until it meet at the Seat of Government.

(Section 125 of the Commonwealth of Australia Constitution Act, 63 and 64 Victoria, Chapter 12.)

Transfer of the Australian Capital Territory to the Commonwealth. On 18 October 1909, the Commonwealth and the State of New South Wales entered into an agreement for the surrender to and acceptance by the Commonwealth of an area of 2,359 square Filometres as the Seat of Government of the Commonwealth. In December 1909, Acts were passed by the Commonwealth and New South Wales Parliaments approving the agreement, and on 5 December 1910, a proclamation was issued vesting the Territory in the Commonwealth on and from 1 January 1911. By the Jervis Bay Territory Acceptance Act 1915, an area of 73 square kilometres at Jervis Bay, surrendered by New South Wales according to an agreement made in 1913, was accepted by the Commonwealth, and was transferred as from 4 September 1915.

⁽a) Represents the administrative area of the City of Canberra as defined at the time of taking each count or Census plus those parts of R.A.A.F. Base Fairbairn, Canberra Airport and H.M.A.S. Harman which are situated beyond the Canberra City District Boundary. (b) Not available for publication. Included in Total Canberra City (c) Includes Phillip. (d) These suburbs formed rural areas not designated as suburbs at the 1967 Population Count. Areas still not designated as suburbs are included in 'Belconnen Other' and 'Weston Creek Other'. (e) Not available on 1971 boundary basis. (f) Includes part of Stromlo.

Note. Figures shown for Census 30 June 1961 exclude those persons who described themselves as being more

than 50 per cent Aboriginal or who described themselves as being 'Aboriginal'.

TABLE 6.—POPULATION: AUSTRALIAN CAPITAL TERRITORY CENSUSES, 1966 AND 1971

The boundaries of the Canberra City District were extended in December 1966 to encompass the Weston Creek and Belconnen development complexes.

(a) Includes 529 persons at Capital Hill.

NOTE. The following suburbs were not separately identified at the 1966 Census: Aranda, Belconnen Other (including Belconnen, Bruce, Charnwood, Flynn, Hawker, Holt, Macgregor, Melba and areas not yet designated suburbs), Cook, Farrer, Fisher, Higgins, Isaacs, Latham, Macquarie, Mawson, O'Malley, Page, Pearce, Phillip, Rivett, Scullin, Torrens, Waramanga, Weetangera, Weston and Weston Creek Other (including Chapman, Holder, Duffy, Stirling, and areas not yet designated as suburbs).

For explanatory notes and criteria for the delimitation of urban boundaries see Census of Population and Housing, 30 June 1971—Field Count Statement No. 9 (Reference Number 2.79).

At the 1966 Census, in conformity with section 127 of the Constitution, Aborigines were excluded from the published population. In 1967 the Constitution was altered to remove this provision, and the 1971 Census therefore includes Aborigines. In order to provide comparability between the two censuses the 1966 populations in this statement have been amended to include Aborigines and therefore differ from the 1966 populations previously published.

⁽a) Recorded ages adjusted by the distribution of ages 'not stated'. (b) Urban Canberra. (c) At the 1967 and 1969 Population Counts, individual ages up to and including 17 years and 19 years respectively were recorded primarily in order to measure the size and distribution of the school age population. For this purpose it was not considered necessary to obtain individual age data from persons in hotels, hostels, etc (other than Hotel Acton which provides initial accommodation for newly resident families awaiting permanent accommodation within the Canberra City District).

Note. Because of the voluntary nature of the question on religion (section 21 of the Census and Statistics Act 1905-1966 states that no person shall be liable to a penalty for not answering the question on religion), many persons do not give particulars of their religion and this accounts for the comparatively large number of persons included in the not stated category.

The classification of religious denominations was enlarged for the 1971 Census with the addition of 'Jehovah's Witness' and 'Muslim', previously included under 'Other Christian' and 'Other non-Christian' respectively.

In the 1971 Census at the request of a number of users of the data, the instruction 'if no religion, write "none" was added to the question. The result has been a significant rise in the 'no religion' category compared with previous censuses and a fall in the 'not stated' category.

Persons aged 5-14 years who failed to answer the question on schooling were allocated a level based on the modal level for their age in the Australian Capital Territory, using the most currently available information on the distribution of the school population by age.

Noti. For the 1971 Census, qualifications were classified to five major levels. The levels were determined as follows:

Doctorate, Master's degree or equivalent conferred by a university in recognition of substantial studies beyond Bachelor level. Bachelor level, and translated diploma or equivalent would be supported.

Bachelor degree, post-graduate diploma or equivalent usually conferred by a university following a period of at least 3 years full-time study or equivalent part-time study.

Other tertiary (excluding university degree or equivalent), a level relating to qualifications obtained following substantial advanced study beyond matriculation conferred by institutions and professional associations, e.g. Associate of Australian Society of Accountants, Diploma in Business Studies, Teaching Certificate, Diploma of Engineering.

Technician, a level which requires theoretical knowledge, as well as practical skills, e.g. wool classing or nursing. Certificates issued by technical colleges following periods of 4 or 5 years part-time study after passing intermediate or final secondary school examinations are classified as 'technician'.

Trade, formal recognition of competency in a skilled manual occupation which is usually obtained through an apprenticeship and satisfactory progress in part-time studies concurrently with practical training (e.g. plumber, fifter, compositor, carpenter, hardreesser).

Some qualifications could not be classified to any of the above levels. Most of these relate to short specialised courses in such fields as typewriting and shorthand, farm book-keeping, dressmaking, automotive maintenance.

LABOUR FORCE, CENSUS, 30 JUNE 1971

EXPLANATORY NOTES

For the 1971 Census, the term 'labour force' is used in place of 'work force' in conformity with the Bureau's quarterly population survey and with international usage,

The labour force is defined as those persons aged 15 years and over who answered 'YES' to any of the following questions on the 1971 Census Schedule:

- (a) Did this person have a full or part-time job, or business or farm of any kind last week?
- (b) Did this person do any work at all last week for payment or profit?
- (c) Was this person temporarily laid off by his employer without pay for the WHOLE of last week?
 (d) Did this person look for work last week?

Thus the labour force comprises those persons who worked, those who had a job from which they were temporarily laid off without pay for the whole of the reference week and those who did not work, did not have a job and were actively looking for work.

Persons helping but not receiving wages or salary who usually worked less than 15 hours a week are excluded from the labour force. Bonded trainees (including trainee teachers) and cadets engaged in full-time study at educational institutions are also excluded, even though such institutions were conducted by their employer.

The unemployed members of the labour force are those persons who answered 'No' to Questions (a) and (b) and 'Yes' to Question (d) AND those who answered 'YEs' to Question (a, 'No' to Question (c). Thus the unemployed consist of those persons who did no work during the reference week and either looked for work (having no job) or were temporarily laid off from a job.

This approach conforms closely to the recommendations of the Eighth International Conference of Labour Statisticians held in Geneva in 1954 and to the approach used at the 1966 Census.

According to the definition any labour force activity during the previous week, however little, results in the person being counted in the labour force.

Thus many persons whose main activity is not a labour force one (e.g. housewife, full-time student) are drawn into the labour force by virtue of part-time or occasional labour force activity in the previous week. Answers to the question on usual major activity indicate that there were substantially more of such persons at the Census of 1971 than at the Census of 1966 and that they were predominantly females.

On the other hand, the definition excludes persons who may frequently or usually participate in the labour force but who in the previous week happened to have withdrawn from the labour force. Answers to the question on usual major activity indicate that there were substantially more of such persons at the Census of 1971 than at the Census of 1966, especially among males.

A similar definition of the labour force is used in the quarterly population sample survey conducted by the Bureau by the method of personal interview. This survey is used to measure changes in the labour force from quarter to quarter in the intercensal period.

Evidence from post-enumeration surveys and pilot tests indicates that the personal interview approach tends to identify a larger number of persons as in the labour force than does the filling in of the census questions on the schedule by the householder and that this tendency has increased between the 1966 and 1971 Censuses.

The above considerations should be borne in mind if comparisons of the total labour force or labour force participation rates are made between the 1966 and 1971 Censuses, or between the 1971 Census and the 1971 labour force quarterly estimates.

(c) Comprises forestry, fishing, trapping; mining and quarrying; electricity, gas, water and sanitary services; transport and storage; communication; finance and property.

Note. The estimates shown above are based on comprehensive data derived for the purpose from the population census of June 1966. The estimates are derived from payroll tax returns, returns of government employment, other direct returns of employment and estimates of the number of employment and covered by these collections.

SURVEYS OF WEEKLY EARNINGS AND HOURS

Surveys conducted for the last pay-period in October each year provide statistics of average weekly earnings (i.e. gross earnings before taxation and other deductions) and average weekly hours paid for. Statistics for employees in the Australian Capital Territory were first collected in October 1972. The surveys exclude employees of private employers not ubject to payroll tax, employees in agriculture and in private households and defence forces. For detailed statistics, explanatory notes and definitions concerning the survey, reference should be made to publications containing survey results (Reference Nos. 6.36 and 6.40).

⁽a) The estimates contained in this table were prepared for the 1974 Forestry and Wood-based Industries Conference, and are based on a definition of forest which differs significantly from that used for previous estimates. The figure for 'Total forest area' is thus not comparable with those appearing in previous issues of this bulletin. (b) Publicly owned land, permanently reserved or dedicated primarily to timber production. (c) Publicly woned land, vacant or occupied under lease, not specifically secured for permanent timber production, but on which control of timber rests with the Crown. (d) Not available separately. Areas in this category have been included with New South Wales figures. (e) Publicly owned land, permanently reserved for purposes other than timber production. (f) Privately owned land, and leasehold land, where the Crown has no control over timber rights. (g) Incomplete; see individual categories.

(a) The statistics shown are based on returns received from government authorities, contractors and owner-builders who undertake the erection of new buildings. Details obtained from government authorities and building contractors refer to all areas. Figures for houses exclude temporary dwellings, dwellings attached to other buildings, sheds, huts, etc. Each flat is counted as an individual living unit. Minor additions and alterations, removations and repairs are excluded. Prior to 1 July 1966, additions of \$10,000 and over to existing buildings are included with new buildings. From 1 July 1966, alterations and/or additions of \$10,000 and over are included with new buildings. The values of new buildings exclude the value of liand and represent the estimated value of buildings on completion. (b) The values shown represent the estimated value of work carried out on buildings during the period. For any buildings the sum of these values obtained during its construction caugust he value of the building on completion. Not available prior to March quarter 1957. (c) The values of work yet to be done on buildings under construction at the end of the period are the differences between the estimated total value of work done at the end of the period and the estimated final value of the building on completion. They therefore represent the values of work which will be carried out in subsequent periods on buildings under construction. Not available prior to March quarter 1957.

⁽a) Figures relate to persons working on the jobs of contractors who undertake the erection of buildings, and government authorities which erect buildings on their own account. They include persons engaged on alterations, additions, repairs and maintenance when these jobs are undertaken by such contractors and authorities. The figures include working principals and their employees, men working as or for sub-contractors, and men temporarily laid off on account of weather. They exclude persons working on owner-built houses and persons working on private buildings (other than houses) which are erected without the services of a contractor responsible for the whole job.

('000)

Figures for December 1955, December 1962 and September 1971 are census figures and relate to motor vehicles as defined for the purposes of the census. Figures for inter-censal dates are estimates on a basis comparable with the census figures. Figures for dates prior to December 1995 are not entirely comparable with later figures. Australian Government owned vehicles in the A.C.T., except those belonging to the defence services, are included in Tables 87 to 89.

TABLE 98.—RECEIPTS AND OUTLAY: AUSTRALIAN CAPITAL TERRITORY, 1969-70 TO 1973-74

This table represents a reclassification of identifiable receipts and outlay relating to the Australian Capital Territory in a National Accounts form. It covers the transactions of the Australian Government in respect of the Australian Capital Territory in the Consolidated Revenue Fund and the following trust funds: A.C.T. Forestry, A.C.T. Housing, A.C.T. Transport and A.C.T. Suspense Account. In addition, details of the financial transactions of the following public corporations are also included: Commonwealth Brickworks, National Capital Development Commission, A.C.T. Electricity Authority, Canberra Theatre Trust, and the Canberra College of Advanced Education.

Revenue derived by the Australian Government from income taxes, sales tax, etc., levied in the Australian Capital Territory and expenditure on items of a national character such as defence, civil aviation, railways, etc., and payments to residents from the National Welfare Fund are nor included. Details of expenditure from the National Welfare Fund may be found in Tables 118 to 122. Details of revenue from, and expenditure on, other items mentioned above are not available.

N 1E. The presentation in this table is based on the new economic type and purpose classification schemes introduced at the time of the 1973-74 budget, and the current statistical series therefore differ from those published in issues of the A.C.T. Statistical Summary prior to 1974. Details of these new classification schemes are outlined in Public Authority Finance: Authorities of the Australian Government 1973-74, No. 11 (Reference No. 5.12). The classification to revision.
